🕒 9:00 AM ET

**BALLERUP, Denmark, May 5, 2026 – LiqTech International, Inc. (Nasdaq: LIQT), a leading clean technology company specializing in advanced filtration systems, today announced it has secured a record order for 10 QlariFlow™ ceramic membrane filtration systems for the Plumpton Aquatic and Leisure Centre in Fraser Rise, Victoria, Australia.**

The order follows the Company's recently announced QlariFlow™ pool project in Northern Europe and surpasses that installation in scale, making it the largest order to date LiqTech's Commercial Pool business.

Secured in collaboration with Waterco Limited, the project marks an important commercial milestone for LiqTech's growing Commercial Pool business. The Plumpton Aquatic and Leisure Centre is being developed as an all-electric facility targeting 5 Star Green Star certification. According to information shared by the project team, it is expected to become Australia's first community aquatic facility to utilize LiqTech ceramic membrane filters.

QlariFlow™ systems are engineered around LiqTech's proprietary silicon carbide (SiC) ceramic membrane technology and are designed to support the operational, sustainability, and space requirements of modern aquatic facilities. In commercial pool and aquatic environments, QlariFlow™ enables precise filtration, stable water quality, and more efficient operations while helping reduce both water consumption and energy use compared to conventional filtration approaches.

The Plumpton project provides an important reference installation for LiqTech in Australia and highlights the growing role of advanced membrane-based filtration solutions in public and community aquatic facilities. As operators and developers increasingly prioritize sustainability, resource efficiency, and long-term operational performance, LiqTech believes QlariFlow™ is well-positioned to meet these evolving market requirements.

"We are proud to announce the largest order in LiqTech's Commercial Pool business to date and pleased to work alongside Waterco Limited and the other partners involved in this important project," said Phillip Myllerup Aslerin, Business Development Director, Pool Systems at LiqTech. "This installation demonstrates how QlariFlow™ can help modern aquatic facilities operate efficiently while supporting sustainability goals, including reduced water consumption and energy use. We view this project as an important reference for further growth in Australia and other international pool markets."

With this order, LiqTech continues to execute its Commercial Pool growth strategy by expanding the global footprint of the QlariFlow™ platform through strong regional partnerships and high-value reference projects.

#### **About LiqTech International, Inc.**

LiqTech International, Inc. is a clean technology company that manufactures and markets highly specialized filtration products and systems for liquid and gas applications. Founded in 2000, LiqTech's patented SiC membranes are designed to treat the most challenging fluids in industrial and municipal water, marine scrubber, and oil & gas applications.
